

# “Plug-and-play” VFD Fan Control

## KE2 Fan Control

- typically 50 - 60% energy savings compared to existing technology
- pre-programmed, wired and tested package reduces installation time significantly, and eliminates the potential for callbacks – install in as little as four hours
- payback regularly 30 months or less
- Fan Load Matching means no wasted horsepower
- 1/2 to 50 horsepower split or non-split condensers
- eligible for energy rebates in most areas
