

Remote monitoring, alarming & control – even KE2 Temps! New, KE2 Local Area Dashboard & Alarms (KE2 LDA) sees them all.

When the KE2 LDA is connected to the same network as KE2 Therm controllers, it immediately, and automatically, scans and finds all KE2 Therm controllers.

The perfect addition to the Refrigeration Network. The KE2 LDA is a simple, multi-functional,

device designed for smaller installations of up to 10 controllers - Ethernet or Serial-ModBus. And, the KE2 LDA enables customers to gain access to their controllers over the Internet by functioning as a conduit to KE2 SmartAccess.

BENEFITS:

- Serve as a Permanent WiFi Service Tool.
- Display a Dashboard showing controllers connected to the customer's network.
- Connect controllers to KE2 SmartAccess customer portal without requiring controller upgrades.
- Send Email Alarms for all connected controllers to multiple email recipients.
- View Serial devices (KE2 Temp, KE2 Low Temp, KE2 Adaptive Control) in a webpage, make changes to setpoints, and receive alerts via email or text message.

For more information visit our website at <http://ke2therm.com/product/ke2-local-area-dashboard-alarms-ke2-lda/> and see bulletin Q.5.42 ■
