

KE2 Therm NATE Training

Focus on troubleshooting using communication technology, and adaptive refrigeration control

As the leader in “smart” refrigeration technology, KE2 Therm’s three NATE recognized training courses explore topics, that for the most part, didn’t exist a decade ago - troubleshooting with remote communication, and adaptive refrigeration technology, among them.

“The launch of the KE2 Evaporator Efficiency controller in 2011, really opened up remote communication and adaptive, demand defrost, for use in commercial refrigeration applications – you didn’t have to have a supermarket to make smart technology feasible”, noted Jeff Kavanagh, VP of Marketing at KE2 Therm. “And, while we have YouTube videos, and comprehensive literature, that supports this technology, we knew contractors wanted the opportunity to learn about “the new stuff” and get certification credit at the same time.”

Training sessions are coordinated through your local KE2 Therm Regional Sales Manager.

COURSES:

- **Course # 40248-000**
Adaptive Refrigeration Control – Installation and Setup
Number of Units Earned: 1
- **Course # 40248-0003**
Refrigeration System Troubleshooting with Communication Technology
Number of Units Earned: 2
- **Course # 40248-0002**
Refrigeration Thermostats
Number of Units Earned: 1

Introducing Our Latest Additions to Technical Sales and Support Teams

KE2 Therm is continuing to expand our team, to ensure we deliver the customer support and technical expertise our customers deserve.

Our newest employees, Alex Newkold and Ken Rennick, bring experience, industry knowledge, and energy. To better acquaint you with Alex and Ken, summaries of their experience follows.

Alex Newkold - Regional Sales Engineer, Ohio Valley

Alex is a graduate of Ohio State University with a B.S. in Industrial Engineering.

He worked as a Sales Engineer at the Sporlan Division of Parker Hannifin for approximately four years, before joining Harting, Inc., a world-wide manufacturer of electronic and electrical components.

While at Harting Alex served as Territory Sales Manager in the Ohio Region, making his move to KE2 Therm’s sales team a natural fit.

Ken Rennick - Technical Application Support

Ken brings invaluable experience in training, technical support and customer service.

He served as a District Trainer/Service Technician for Sears Holdings for 30 years, earning top technician performance awards 8 times.

Since 2012, Ken has worked at Ranken Technical College, St. Louis as a Major Appliance Technology Instructor. In addition to assisting as an instructor for HVAC and Basic Electric courses, Ken designed, implemented, and taught the major appliance repair program.
