

## Contractors Buy 5, Get 1 Free KE2 Temp Summer Truck Stock Sale

KE2 Therm recently launched a truck stock promotion for the KE2 Temp family of products. Any combination of five KE2 Temp + Defrost, KE2 Low Temp, or KE2 Temp + Valve controllers a contractor purchases, between June 12th and August 31st, they can receive a free KE2 Temp + Defrost controller.

Getting free controllers is great way to improve profitability. Plus, the purchased controllers are eligible for points on our Contractor Loyalty Program. Giving contractors another way to earn free KE2 Therm products.

Just provide proof of the purchase (wholesaler receipt/invoice) to [Orders@ke2therm.com](mailto:Orders@ke2therm.com), and your free controller will ship directly from KE2 Therm ■

**KE2 Temp SUMMER SALE**  
*Truck Stock*

**Every 5 you buy, get 1 Free\***

\* Buy any combination of 5 controllers from the KE2 Temp Family (KE2 Temp+Defrost, KE2 Temp + Valve & KE2 Low Temp) and get a KE2 Temp + Defrost controller FREE.

**Why use the KE2 Temp over other thermostats and timers?**

- Replaces a defrost time clock and thermostat
- Programmable defrost schedule
- Most robust relay
- Free communication, when used with the KE2 LDA – Remote Monitoring, Control, Alarm Notifications  
The KE2 Temp includes RS-485 Modbus communications, and can now be accessed remotely using the KE2 Local Area Dashboard and Alarms (KE2 LDA).
- Service Call Saver - Post Defrost Indicator  
To eliminate unnecessary service calls, the KE2 Temp + Defrost alerts the user when it is coming out of a defrost cycle using the on-board display. The display alternates between dEF and the actual temperature measured by the air sensor. This continues until the temperature has reached setpoint, or for the amount of time set by dFt (Defrost Time) whichever is shorter.

**Offer good on KE2 Temp, KE2 Temp + Valve, and KE2 Low Temp controllers purchased through August 31, 2018.**

Proof of purchase must be provided to KE2 Therm by **September 28, 2018** to receive free controller(s). Contact [orders@ke2therm.com](mailto:orders@ke2therm.com).

## Adobe Flash – a thing of the past

In November of 2011, Adobe announced that it would no longer provide updates and support for the company's Adobe Flash for mobile. As a result, KE2 Therm began switching to HTML programming.

The HTML programming insures our controller's firmware is accessible via the various web browsers on the market.

KE2 Therm's release of the KE2 Evaporator Efficiency version 3.0 in March 2013 was the first KE2 Therm controller to use the HTML format.

Now, seven years after the Adobe announcement, customers with controllers using firmware prior to v3.0 are beginning to see issues with web browsers that do not allow Adobe Flash.

### There are three ways to overcome this:

- 1 Update the controller's firmware to the current version. Download free from the KE2 Therm website.
- 2 Use a computer that still has an older browser that supports Flash.
- 3 Replace the controller with one that has the HTML pages already loaded. ■
