

Information and updates from KE2 Therm Solutions

KE2 Evap for Rack Efficiency, easier than ever to install.

Contactor Panel Now Available

The January 2016 launch of the KE2 Evap for Rack Efficiency (KE2 Evap-RE) expands on the KE2 Evaporator Efficiency's capabilities for control and communication, providing additional functions for managing the unique challenges associated with rack systems.

Now, to simplify on-site wiring or controller related components, provide consistent setup, and reduce installation time, the KE2 Evap-RE available in pre-wired contactor box configurations.

The contactor panel is available with a KE2 Simple Interface Board (also available separately) to allow for simultaneous control of EEVs and EEPRV's ■

Color Temperature Sensors Provide Clarity and Consistency

KE2 Therm's three-pack of color temperature sensors were originally introduced as a standard item in the KE2 Evaporator Efficiency Ultimate Install kit. The 40' sensor pack included a green, yellow and blue sensor that could be used interchangeably for air or coil sensor.

The popularity was instantaneous for many installers, who realized that for clarity and consistency, standardizing (blue-room air, yellow-coil temp, green-2nd coil temp) eliminated confusion during the install, and on return visits.

Now, with more contractors requesting the option in other KE2 Therm controller kits, KE2 Therm is making the color sensors standard in 15 foot length, for many of our controllers.

Note: All sensors can be used for any purpose and are interchangeable, colors are for ease of identification only. ■

KE2 Therm is Growing!

In support of our continued growth, we have openings for Regional Sales Managers, Sales Engineers, and Application/Technical Support.

Regional Sales Manager

Help develop and execute on the sales strategy for an entire sales region

- A strong technical aptitude
- 4-year Mechanical Engineering degree or equivalent
- 5 plus years industrial B2B sales experience
- Strong commercial refrigeration experience
- The ability to lead and develop others
- The ability to work as part of a team
- Excellent consultative selling skills

Full Description: <http://ke2therm.com/company/available-positions/regional-sales-manager/>

Sales Engineer

Lead the business development activities within a defined geography

- A strong technical aptitude
- 4-year Mechanical Engineering degree or equivalent
- 5 plus years industrial B2B sales experience
- Strong experience in commercial refrigeration
- The ability to work as part of a team
- Excellent consultative selling skills

Full Description: <http://ke2therm.com/company/available-positions/sales-engineer/>

Application / Technical Support

Responsible for providing technical and application support of KE2 Therm products for direct customers, contractors, and end users

- 2-year diploma or equivalent experience in refrigeration technology
- Two years of experience in technical support role in a related industry
- Strong verbal and written communication skills
- Working knowledge of Microsoft Excel, Power Point and Word
