Geo Harris Takes Over as Regional Sales Manager for the Southwest

The latest addition to KE2 Therm's quickly growing sales team is Geo Harris, P.E.

Geo has a diverse history in the HVACR industry. His first position, after graduating from

the University of Delaware with a B.S. in Mechanical Engineering, was as HVAC Project Engineer for Clive Samuels & Associates.

Later, Geo joined Southwest Refrigeration as the Engineering Manager, where he worked for over 10 years.

This extensive industry experience, as well as his familiarity with the Southwest states, are a tailored fit for KE2 Therm's regional sales manager in the states of Arizona, California, Nevada & Hawaii.

Geo is available by email at, geo.harris@ke2therm.com or on his cell, 949.375.5732. ■

KE2 Therm to Present at Educators Conference

Neal Thompson of KE2 Therm will conduct training sessions at the upcoming HVACR Educators Conference in Orlando Florida, March 26-28. The presentation revolves around turning students into refrigeration system experts, by training them on the latest industry technology.

The course titled, **"The latest in refrigeration control and communication technology"** encourages educators to go beyond teaching refrigeration basics, like theory and mechanical control use, and train students on "smart" controllers.

These energy-efficient electronic controls are gaining popularity for more than just energy savings, they are also more accurate than mechanical controls, and can provide remote access, alarm notifications, and more.

Material for the session includes examples from the recently revamped curriculum at Ranken Technical College in St. Louis. Recognizing the industry-wide surge in the use of electronic controls, Ranken modified their curriculum to provide additional focus, and hands-on experience with these advanced components. The components they selected for their program are the KE2 Evaporator Efficiency, KE2 Temp + Defrost and KE2 LDA communication device. ■

Japanese Customer Puts Booth Emphasis on KE2 Therm

One of KE2 Therm's biggest Japanese customers, Nanba, exhibited the KE2 Evap at the Japan Supermarket Tradeshow 2017. The show is the largest national exhibition in Japan for supermarkets and food related end-users.

A significant portion of Nanba's booth real estate was dedicated to KE2 Therm products. And, the company not only captured several strong leads, with large and small supermarket chains, during the exhibition they also confirmed sales to a fish wholesale chain. ■
